

the ultimate commission accounting system

eAgentCenter

eAgentCenter is a powerful, stand-alone tool to manage your agency. This web-based system provides agents, managers, and administrators with beneficial services that are essential to their workload.

For agents, eAgentCenter offers a single location that you can use to view and download statements, both recent and past. You may also view the status of open charged back policies and other important information. eAgentCenter allows you to update and maintain personal information from basic contact to tax forms.

For managers, eAgentCenter provides easy access to policy and client information. With eAgentCenter, you can review the downline agents' statements and oversee productions of both your agents and your office as a whole. Managers who are also agents may enjoy additional benefits, such as the ability to view and update their own information, as well as management over the entire hierarchy.

For administrators, eAgentCenter allows you to adjust agent hierarchy and contract levels. This system also provides a secure, easy-to-access location where you can share important documents with your agents. eAgentCenter also gives everyone with the ability to view, sort, and search appointments and records to assess its details.
